Adventures of Alice in Moneyland

"It won't be long now," said the Mad Hatter, rubbing his hands and looking cheerful, "before we money lenders are once more in our Heaven and all's well with the world."

"What makes you think that?" asked Alice.

"Because," replied the Mad Hatter, "the necessary steps are being taken everywhere to cure the Depression."

"What are the necessary steps?" said Alice curiously.

"The necessary steps," replied the Mad Hatter, "are restriction and destruction."

"Are many things being restricted and destroyed?" asked Alice.

"I should say so," said the Mad Hatter gleefully, "in the East Indies, coffee in Brazil, oranges in Spain, extra in Holland, cotton in the United States, wheat, everywhere, potatoes, rubber, sugar, oil and scores of other things the common people need badly but haven't the money to buy."

"It seems a queer way to get out of the Depression," said Alice thoughtfully.

"It's not queer at all," said the Mad Hatter. "It's very sensible and logical. Whenever a depression comes, a large number of the common people find themselves without money and so are unable to buy food and clothes and things. Therefore it's only logical to start at once to destroy food and clothes and continue so to do until there is hardly enough left for those people who have money."

"I don't see anything logical about it," said Alice. "Won't the common people who haven't any money suffer dreadfully?"

"Undoubtedly," replied the Mad Hatter, "but their suffering though severe is salutary. If we didn't restrict and destroy, money-lenders wouldn't be able to loan, and therefore the world couldn't escape from its Depression."

"I think you're talking nonsense," said Alice. "Why does the food have to be destroyed?"

"So there won't be an unwanted surplus of food," said the Mad Hatter, gravely.

"What's an unwanted surplus?" asked Alice.

"An unwanted surplus of food," replied the Mad Hatter, "is a supply of food which that portion of the population which has the money doesn't want to buy."

"But the common people who haven't money want it," cried Alice. "So why destroy it?"

"Of course they want it," said the Mad Hatter irritably, "but they can't buy it, so it must be destroyed. If it wasn't destroyed prices would fall."

"Why would they fall?" asked Alice.

"I've just told you," said the Mad Hatter, "because there is more food than the people with money want. Prices always fall when there's more of a thing than the people with money want."

"Suppose," said Alice slowly, "the moneyless common people had money, would it still be necessary to destroy their food?"

"Of course it wouldn't be necessary," replied the Mad Hatter, "but I've just told you that when a depression comes that's just what they haven't got—so why ask foolish questions?"

"I only asked," replied Alice, "because I thought that perhaps you and the March Hare and the other money-lenders might loan the common people money, then, you see, they wouldn't have to starve and their food wouldn't have to be destroyed."

"That," said the Mad Hatter harshly, "is heresy. What you are suggesting, Miss Alice, is that a money-lender should finance consumption. That is something I have never done, and Well Street helping me, I never will."

"I don't see why," said Alice.

"Because," replied the Mad Hatter, "I've never done it. Moreover, I think it's too risky."

"Then why not let the Government Dismouse do it?" cried Alice, "and don't be such a dog in the manger. If the Dismouse did it the common people wouldn't have to starve and their food wouldn't be destroyed."

"I tell you," replied the Mad Hatter, "such a policy wouldn't do at all. I and my fellow money-lenders are the only people who have the right to create and loan money."

"Who gave you that right?" asked Alice.

"That question is merely impertinent. It doesn't deserve an answer. Besides, everyone knows the March Hare and I and our friends are the only people who know when, where, how and to whom, money should be loaned. Our record speaks for itself."

SPRUCEVILLE NEWS

Don't forget the Big Valentine Dance in Spruceville Hall Friday, Feb. 16th. Bone's well-known Orchestra will be there, and Spruceville Ladies are planning that everyone shall have a real good time.

On Monday Mrs. W. P. Young entertained several of her friends to an evening of "500". Everyone reported a great time; a dainty lunch was served by the hostess at the conclusion of the evening. First prizes were won by Mrs. O. S. Young and Mr. Kasha, (what an escape, Bill), and caused lots of fun.

On Tuesday night the Regular Meeting of the U.F.A. and U.F.W.A. was held at Mr. and Mrs. Barnes' home. Very interesting discussions were held on a variety of topics; this U.F.A. Convention and Douglas Social Credit seemed to be of paramount importance. Plans were laid for a debate to be held some time in March. A speaker on the Bank of Canada will also be brought in during the near future.

Mrs. Rice returned from Edmonton on Saturday with Mrs. Ramsey. Messrs. Heath, Ross and Wilkes motored to Edmonton on Monday to attend the Annual Reunion of their Regiment, the 19th Alberta Dragoons, returning the same night.

The Junior U.F.A. are putting on a Masquerade Dance of Friday, Feb. 22nd. The Old Time Orchestra from Red Deer will supply the music. There will be four prizes: Best Lady and Gentleman; and Best Male and Female Comic. Mr. and Mrs. Ed. Stout and Mr. W. P. Young were Sunday visitors at the home of Mr. and Mrs. O. S. Young.

The U.F.W.A. will meet at the home of Mrs. W. W. Burton on Wednesday afternoon, Feb. 20th. The Roll Call will be answered by "Ode to the Old Time Orchestra". On Thursday Mr. and Mrs. Roy Burton entertained several of the "Young Marrieds" to cards, and a very enjoyable time was spent.

On Thursday Henry Lomax started saving at Mr. Tyrrell's place, and he expects to be engaged there at least two weeks.

RIMBEY NEWS

Miss Martha and Clara Byers entertained sixteen young people at Bridge on Friday evening, Feb. 8th, at their home a mile north of Rimby. The honors at cards were won by Miss Anna Ebbes and Mr. Allan Pelleyman. The guests were conveyed to and from town in a sleigh and the ride was one of the enjoyable features of a very pleasant evening.

Rimby has certainly gained a new friend since Mr. M. Sheppard took the initiative some weeks ago when he purchased a fine Curtis-Robin plane. Pilot Frank Burton of the Edmonton and North-West Alberta Aero Club flew a north plane down to Rimby on Sunday, Feb. 10th, to give a course. With a possible second group to start later on.

Mr. Benjamin Gunn was elected to fill the vacancy left by Mr. Frank Donnelly. Mr. Gunn's term is for three years. Other members of the council are Mr. C. J. Hewitt and Mr. L. S. Cutler.

Chicken pox is still prevalent in Rimby and surrounding district.

A miscellaneous shower in honor of Miss Melvina Wright, a February bride-elect was held at the home of Mrs. S. N. Rimby on Thursday, February 8th. Forty ladies attended and following the presentation of many useful and attractive gifts, enjoyed a program of contests and a delicious lunch. Miss Wright whose marriage to Mr. Vernon Lane of Alx has been announced for February 13th, is the eldest daughter of Evangelist and Mrs. J. W. Wright of Rimby and the grand-daughter of Mr. and Mrs. B. N. Rimby, pioneer settlers of Rimby.

Miss Alma Riley of Northern Bible College at Red Deer spent the week-end with friends in Rimby.

Miss Margaret Berry of Lacombe is a guest this week at the home of Mr. and Mrs. H. J. Lemon, north of Rimby.

POPULAR COUPLE CELEBRATE ANNIVERSARY

Seventy-five neighbors and friends of Mr. and Mrs. M. Stanley Auger gathered at the Auger home near Rimby on Saturday evening in honor of the 25th anniversary of Mr. and Mrs. Auger's wedding day.

The party was a complete surprise to the "not so newly-weds" who having been called away from home during the afternoon returned to find a hot chicken dinner ready for them and the guests.

A presentation of a complete set of silver flatware from those assembled, a silver pyrex dish from the members of the Rosedale U.F.W.A. of which Mrs. Auger is the president and various other gifts of silver articles from individuals was made to the popular couple.

Both Mr. and Mrs. Auger responded expressing their appreciation and thanks for the kindly thoughts which had prompted the party. An impromptu program followed the dinner. Mr. and Mrs. Auger who are originally from Ontario came to Rimby 24 years ago from the Yukon where Mr. Auger had been engaged in business and in prospecting for gold since 1902 and where Mrs. Auger spent the first year of her married life having travelled the distance from her home in Toronto by rail and boat to Skagway and from White Horse to Dawson City, distance of 370 miles, overland by sleigh. Mr. Auger is a brother of Dr. E. Auger, of Stettler, formerly of Lacombe.

SOCIAL CREDIT IS STRONG OUT WEST

The Social Credit Study Group of Rimby met in the United Church Club rooms on Thursday evening with twenty-five members and several visitors present. Mr. J. W. Hoesley the president, occupied the chair and Mr. Jack Mangan acted as secretary in the absence of Mr. Ottar Manning. The program was in charge of Mr. C. C. Letroy and Mr. Gunn and each gave a paper on the credit system. This was followed by an interesting informal discussion and it was decided to take a straw vote in the near future. Social Credit is gaining many followers in the West.

CAMROSE POOLERS DEFEAT LACOMBE

Lacombe Juniorites lost to Camrose Poolers Saturday night 7-4 before a large crowd of fans. With keen ice both teams played extremely fast hockey.

Hockey Team Is in the Lead

Hockey fans to the number of over 500 witnessed not only an exciting game of hockey Saturday night, but one of the nicest demonstrations of goal-keeping that has been seen here in many a year. Coming into the game with a one goal margin over Stettler, our boys were out to hold that margin and win the first lap of the series, which they did. A heavy defensive game with five men back behind our blue line was the order of play throughout most of the game. However, in the first period, our forwards went into the play fast right from the bell and after about ten minutes of play Penman broke through the Stettler defence and Lacombe a three goal lead. The locals then settled back to a defensive game and with our men strung across the blue line, backed by Gordon Craigie between the posts they were ready for anything and all that Stettler had.

Believe us, Craigie was great there in the net, throughout those sixty minutes of guffing hockey. With all our men back and all Stettler's men up around our goal, Gordon was literally peppered with shots from every conceivable angle. And he did play. Some of his saves were miraculous and the way he took care of some of the toughest breaks given any goal-keeper gave the fans the greatest thrills of the game. Just three goals got by him, and one at least was a very doubtful goal, as the puck went over the net, struck the goal judge and dropped down behind Craigie into the net. Gordon's wonderful performance in the goal will live long in the memory of all the fans who witnessed this game.

Brooks the captain of our squad of players, certainly deserves great praise for the way he managed the men on the ice. Every man was where he should have been and that is what brought forth the win. L. McKinnon got a break in the second frame that he gave his team the lead, Stettler having got their first counter shortly before this. Earl Calkins, Hoppus and L. Calkins made a great defensive barrier, and brought many extremely dangerous Stettler attacks to a halt. Wilson, Todd and McCaughey were playing a great brand of hockey and McCaughey's back-checking broke up plenty of Stettler's combination rushes.

Hoppus who figured in the scoring, also played a great game on defence. He certainly jolted plenty of the visitors out of the puck. Earl Calkins on the defence was certainly hard to get past.

Penman took a slice at a Stettler player and drew a couple of minutes, owing to the fact that the referee was looking right at him. This was the sequel to a melee at the east end of the rink when two Stettler players held him and would not let go.

From start to finish the game was undoubtedly the most thrilling in the entire playing season. As Stettler closed up the gap in the scores, the suspense became acute, and the last ten minutes of play seemed like an hour. Fans were breathlessly waiting for the bell to end the most fascinating game witnessed here in years.

It was a great series to win. That speedy bunch of lads from out East had consistently beaten Lacombe and other teams in the Big 5 League by large scores right up to last Thursday game. The previous two games against Stettler resulted 8-1 and 9-1 respectively in Stettler's favor. Most fans did not in their wildest dreams anticipate a win for Lacombe on Stettler ice—but the local lid did win. Fans from north, south and west were there and most of them were pulling for our boys. About 100 fans from Stettler accompanied their team in and were certainly very disappointed crowd when they went back home.

LACOMBE JUNIORS DEFEAT BENTLEY 6-5

In a free scoring exhibition encounter here the Lacombe school pucksters noosed out a 6-5 decision over the visiting Bentley scholars.

Todd got four goals while Wilkes got two. R. Garrie scored four for the visitors. McGedgen marked up the fifth for Bentley.

BAPTIST CHURCH

Evangelistic Service, Sunday at 7:30 p.m. Church School at 11.

Junior at 6:15.

B.Y.P.U. Monday at 8 p.m.

Young people are invited to the Valentine party Monday at 8 p.m.

You are always welcome.

Canada's New Magna Charta

Canada girls for war on social injustice, on human misery and poverty. A new Magna Charta of human rights is evolving as inevitably as the rising of tomorrow's sun. Epochal changes are in the making for 1935, born out of the needs of our underprivileged and by the recognition of our leaders that such needs must be met.

A general election impends and seldom has Canada listened with a more attentive ear to the declaration of her aspiring leaders. Never have platform pledges dealt with more practical issues. And never have our would-be leaders dealt with a more analytical voter's attitude.

John Smith, average Canadian, is today amazingly well informed in the matter of good government. Four years of economic crises have made every man his own statistician. Four years of crushing tax burdens and of helping his less fortunate neighbor carry on have emphasized the urgent need for a more scientific and more fairly distributed division of responsibility in maintaining the affairs of state.

Child labor, sweatshops, and profits attained at the expense of human degradation—these three blot on the pages of modern industry will be erased under any form of New Deal. Old age will be assured of comfort and security under revision of the Old Age Pensions Act.

The dole system will have no place in Canada's New Deal. It has justly been described as an insult to a young and aggressive country with its future ahead, not behind it. The dole is a final condemnation of self-government. It is a step backward to a state of feudalism. A scientific plan of insurance against unemployment is the nearest solution.

Hard-pressed farmers can face 1935 with fortitude. Debt adjustments are in view, affording our needy basic producers the one real relief measure they have sought for years.

Financial sleight-of-hand experts will find it more difficult to confront proposed changes with equanimity. Elimination of stock valuation, share splitting, and other financial financial shenanigans is one of the first steps in any New Deal.

If you are a producer, your taxes will be decreased rather than increased. But if your job in life consists merely in clipping coupons and endorsing dividend cheques, the suggested New Deal has unpleasant aspects.

The suggested New Deal does not confine itself solely to Canada's internal problems. The Dominion fashions a whip hand over unruly nations in the cause of international peace: Denial of Canadian credit or export shipments in the event of hostilities—a threat with formidable teeth in it when one considers that Canada controls 80 per cent of the world's supply of nickel, most indispensable of all armament metals.

Thus 1935 witnesses epochal changes in the making—greater and more constructive changes than have occurred since Confederation. Newer and saner creeds of self-government are arising from the ashes of outworn political traditions which might have served other needs in different circumstances. A new type of leadership has evolved out of our hectic times—a leadership having little in common with the despotic dictatorships of Europe and Asia.

The dawn of a new era is at hand. Canada—a Canada comprised of all parties and classes—opens a new chapter in human progress. It will remain for the history books of the future to proportion the relative significance of the New Deal, 1935 style, as compared with that historical charter signed by the reluctant John seven centuries earlier.

CANADIAN LEGION

About twenty members attended the luncheon and annual business meeting of the Lacombe Branch of the Canadian Legion, held in the Empress Hotel on Saturday evening. They propose holding a couple of smokers during the year and arrangements for the Vimy dinner, including speaker, were also considered. Election of officers for the ensuing year resulted as follows: President, F. Ryer; 1st Vice-Pres., G. E. Mann; 2nd Vice-Pres., Wm. McNab; Secy-Treas., T. H. Thompson; Executive, S. Edmunds, F. Wilkes, Wm. Anderson, S. Puffer, J. McDonald, Wm. Rankin, Lacombe; Mr. Wm. Grant, Bentley; J. B. Wilson, Olive.

Warm appreciation was expressed over the excellent luncheon provided by Mrs. Gillies and the Empress Hotel.

Card party and social evening at Lakeside School, Friday evening, February 22nd. Also a curling to be raffled. Everybody welcome.

THE CHURCH OF ENGLAND IN CANADA

Dioecesis of Calgary

St. Cyprian's Church, Lacombe

Incumbent: Rev. T. H. Chapman

Organist: Mrs. L. D. Wright

Friday, February 15th: A "Young People's Rally" under the auspices of the Anglican Young People's Association in the Red Deer. Deacons will be held in the Oddfellows' Hall, Lacombe. Registration 25c. Please be on hand at 3 p.m.

February 17th: Septuagesima

9:00 a.m. Special Service instead of S.S.

11:00 a.m. Holy Communion and Sermon.

7:30 p.m. The Annual Meeting of Parishioners which will begin at 8 p.m., preceded by a half-hour of music.

FAIRVIEW NEWS

Mrs. Merle Munroe who underwent a very serious operation is slowly improving.

A Turkey supper will be held at Fairview Church on Monday, Feb. 18, starting at 6:30 p.m. Adults 25c; Children 15c. A program will follow.

Mr. Dunker's friends will be sorry to hear that he is confined to the house through illness.

Mrs. E. Ogilvie spent a few days last week in Lacombe visiting with friends.

was made for the money lender, not the money-lender for the world."

"Quite so," said the March Hare.

Toronto "Saturday Night."

WE THANK YOU

We, the teachers of the Lacombe School, wish to thank those who attended the bridge party at the school on Thursday, January 31. We also appreciated the donations sent in by those who were unable to come.

The McDonald Drug Co., Morris on and Johnson, Ltd., and Sweet's Pharmacy kindly donated the prizes; and the Furniture Store loaned us the dishes. The parents willingly gave the cakes and cream.

Twenty-eight dollars (\$28) were realized. This sum is to be used for the vocal training of the children for the School Festival as well as to defray other expenses which may occur in connection with the Festival.

J. I. Simpson (1) Vice-President and General Manager, Dupont Tire & Rubber Goods Co., Limited, who presented the Lacombe Excelsior Group with a trophy.

P. E. Jones (2) as General Manager, J. E. Lever (3) as Manager, The Dominion and E. B. Fitchard (4) as Sales Manager, and J. I. Simpson (5) as President of the Lacombe Excelsior Group.

The Lacombe Excelsior Group is a group of men who are interested in the promotion of the Lacombe School and the Lacombe Community.

WORLD HAPPENINGS
BRIEFLY TOLD

Hon. Iyeman Tokugawa, retiring Japanese minister to Canada, left Ottawa recently for his new post as Japanese minister to Turkey.

George Jihaves, 50, Dupard, Man., farmer was instantly killed when the truck he was driving crashed into a 60-foot pole protruding from the rear of another truck.

Stephen Leacock, Canadian humorist, was presented the Mark Twain medal, awarded annually by the Mark Twain Society. Leacock is professor of economics at McGill University.

Under the farm-help relief plan, 4,400 single unemployed men have already been placed on Manitoba farms this winter and the relief commission expected last winter's total of 5,140 placements would be exceeded.

Some form of agricultural output restriction was an imperative need to benefit the next growing season, E. D. Barrow, M.L.A., provisional president of the new British Columbia Chamber of Commerce, said in an address to the advertising and sales bureau of the Vancouver Board of Trade.

Total forest fires damage in British Columbia during 1934 was \$993,483, highest on record with the exception of 1925. Hon. A. Wells Gray, minister of lands, reported. The damage was three times greater than the previous year, and the area burned over, 640,811 acres, was more than double that of 1933.

William Gillespie, Theoretical, Ontario, farmer, revealed he was investigating a report a white woman who might be his sister had been found among Indians of Lake Lake, near the Ontario-Manitoba boundary, almost half a century after she disappeared on a berry-picking expedition. Maud Gillespie, the sister, disappeared 46 years ago at the age of 12.

Ploughing The Ocean Bed

Deep Furrows Required To Protect Cable From Accidents

It's not quite spring yet, but just the same they're being doing a bit of ploughing out on the Atlantic. And it's not the ploughing of the waves that the poets like to write about, either.

No, this is real honest-to-goodness ploughing, with a real plough digging into real earth and turning up a clean, straight furrow that would delight a farmer's heart. The truth is, it goes the farmer one better, because our plough does the planting, too, and covers up the furrow again when it's through.

The planting has been going on far below the surface, on the Atlantic's rough bottom. Submarine cables is what they're being planting—or laying—100 miles to the south-west of Ireland, and already 20 miles of it have been laid down.

The horse, so to speak, in this new form of ploughing is the good ship Lord Kelvin, a cable steamer, which was moved from Halifax to England this year to conduct experiments and deep-sea cable-laying.

The idea is to bury the cables so they will be safe from the trawls of deep-sea fishing craft. And here's how they go about it.

Three-quarters of a mile behind the Lord Kelvin, the plough is dragged. As it negotiates the ridges and depressions of the ocean bed, it cuts out a trench 18 inches deep. Cable is fed into the trench and then earth is scraped back over it.

Result, the cable is protected so effectively the Lord Kelvin has been able to dig it out only once out of 20 attempts. Which would not appear to give the trawlers much chance.

The innovation is expected to cut down the damage caused by the trawls and efforts at heavy saving. One company alone spends around \$250,000 yearly in repairing its cables.

Have To Slow Down

Large Liners Forced To Slacken Speed In Heavy Sea

Even the largest ocean liners have to slow down when they are sailing into a heavy sea in a gale. Although the huge steamers take the waves well and dig right into the rollers, the skippers know their vessels will not stand the strain at full speed. That is why so many ships are a day or more late when they have to face a storm on the ocean. Naturally the companies do not want their boats broken up and the orders are to ease up on the speed when it is necessary.

On one occasion a year or so ago one of the large liners turned about in mid-ocean to distress the rescue of a vessel in distress. But even under those circumstances the captain could not let his steamer go at full speed.

Had he done so, he too might soon have been in as great distress as the ship that had called for help—W. L. Clark, in Border Cities Star.

An anti-peritonitis vaccine has been called a 100 per cent success after 1,000 tests. It annihilates the whole corpuscles where infection may set in.

Now if they'd only put a zipper zipper in that cellophane wrapper.

W. N. U. 3082

Prefer Caribou Skin

Buffalo Hides Too Heavy And Eskimos Dislike Them

Reports that 500 green buffalo hides are being shipped to Churchill are not finding favor with tribesmen along the northern shores of Hudson bay. A shipment was sent to Chesterfield Inlet, 250 miles north of Churchill, two years ago, but only those in dire straits would accept one.

The native, constantly on the move, must travel light. Even when roasting the buffalo hides are so heavy that the Eskimo who must take his family and equipment with him soon discards them. The women find great difficulty drying the hides in their igloo.

Caribou skin is the favorite of the northern native for both garments and sleeping bench covering. It is light, warm and easily tanned. A buffalo covering for sleeping bench and igloo and a sleeping-bag would weigh in the neighborhood of 100 pounds.

Trying Out Welded Rails

Experiment Being Made In Germany By State Railway

Welded rails are being used in tests being made by the German State Railway to determine whether they can be used at high rates of speed and whether they cause any bad effects to the trains. A trial railroad line has been constructed of welded rails, each approximately 98 feet long and so connected that there are practically no joints. An express train, without passengers, will be driven over this line until a mileage of about 62,500 is attained. These tests are to last about three months with 10 trips being made each day at a speed of from 75 to 95 miles an hour.

Will Use Autogyros

British Admiralty Adding Them To Naval Aviation Units

The British admiralty has decided to add autogyros to its naval aviation units, the Daily Telegraph reported.

Commenting on the reported decision, the newspaper's naval expert, Hector Bywater, declared: "Under the present circumstances airplane carriers are indispensable. The admiralty, however, would welcome a perfected autogyro or airplane able to land in a small area, rendering unnecessary large airplane carriers, which are burdensome and vulnerable."

FASHION FANCIES

DESIGNED ESPECIALLY FOR MATURE FIGURE TO DISGUISE OVERWEIGHT—AND IT DOES IT BEAUTIFULLY

By Ellen Worth

This charming dress of black satin back crepe expresses simple dignity for the mature figure. The reverse color is outlined by shiny surface of the crepe, which makes a very effective trim. There is slight flaring toward the hem of the length-giving paneled skirt, which gives nice freedom for walking.

You'll be astonished how quickly you can make this dress—and for a very nominal sum. Feebly crepe silk, lightweight woollen velvet, are equally lovely to carry it out.

Style No. 993 is designed for sizes 36, 38, 40, 42, 44, 46 and 48-inches bust. Size 36 requires 4½ yards of 36-inch material with ½ yard of 18-inch or wider contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Enclose 20c extra if you wish a copy of our Fall and Winter Fashion Magazine. Pattern and magazines are mailed post paid.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

To Raise Qualifications

Increase In Drug Apprenticeship Requirements May Come In Saskatchewan

Substantial increases in drug apprenticeship requirements in Saskatchewan may result from amendments to apprenticeship laws suggested at the semi-annual council meeting of the Saskatchewan Pharmaceutical Association in Regina.

The amendment discussed will be brought before the association at the annual convention in Moose Jaw, July 19 and 21. It calls for an increase in apprentice educational qualifications from Grade XI to Grade XII diploma.

Also proposed is a qualification of 24 months apprenticeship before a pharmaceutical applicant be accepted for university training. After the first term of university work the apprentice would be required to serve another 12 months before completing his course.

Tests Were Successful

Novel Diving Suit Easily Handled And Quickly Put On

Tests of a novel diving suit for saving drowning persons, just completed in the lake at Geneva, Switzerland, are reported to have been successful. The suit was invented by Commander Prieur of the French Navy. The essential point about it is that the diver wears a breastplate which is really a steel bottle of compressed air. The whole suit is easily handled and can be put on in 30 seconds. The diver can remain below the surface for about 25 minutes. He is quite free of the ropes or air tubes which usually connected divers with a boat overhead. At the public demonstration three men remained under water for a long period.

Recipes For This Week

(By Betty Barclay)

CORN FLAKE CHARLOTTE

2½ cups corn flakes
2 cups sweetened apple sauce
Rind of ¼ lemon or
Juice of ½ orange or lemon
2 tablespoons butter
In a buttered casserole spread a layer of corn flakes crumbs. Cover with apple sauce, to which the fruit juice has been added. Top with corn flakes and dot with butter. Bake in 15 minutes in a moderate oven (400 deg. F.). Serve with whipped cream. Yield: Six servings.

DUCHESS SOUP

2 tablespoons quick-cooking tapioca
1 teaspoon salt
1 teaspoon pepper
1 tablespoon minced onion
4 cups milk
2 tablespoons butter
½ cup grated American cheese
2 tablespoons chopped parsley
Combine quick-cooking tapioca, salt, pepper, onion, and milk in top of double boiler. Place over rapidly boiling water, bring to scalding point (allow 5 to 7 minutes), and cook 5 minutes, stirring frequently. Add butter, cheese, and parsley, and cook until cheese is melted. Serves 4 to 6.

"Cheap Flying For Masses"

Aviation Club In England Has Over 400 Members

With the slogan, "Cheap Flying For The Masses," the Northamptonshire Aviation Club reported at the opening of its clubhouse recently at Bywell, England, that its plan is a success. It has more than 400 members, the majority being small merchants and artisans. The subscription is \$6.25 a year and the club finance instructions to the extent of \$5 an hour, providing the student gets his flying license within eight hours. The club is expected to become the largest civil aviation organization in the country.

BUSINESS ON THE UPTURN

A definite indication that conditions are improving and that business is on the upturn is shown by the fact that the Salada Tea Company sold over 84% more tea in Western Canada in 1934 than in 1933. This is especially significant since Salada is a quality tea.

VIII Test League

Captain Anthony Eden, British disarmament expert and Lord Privy Seal, said in a speech at Newcastle, England, in which he reviewed the international situation: "We stand on the threshold of what I believe will prove to be the most challenging year in post-war history. But there is no call for fatalism or defeatism on that account. The year 1935 will show whether we can make the League of Nations effective. I, myself, am an optimist."

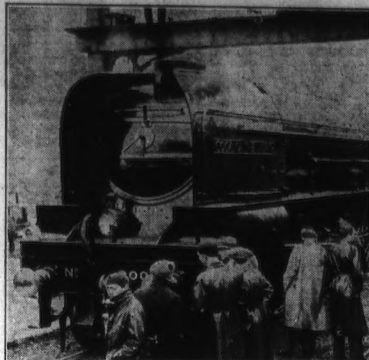

Collection First

"Am dere anybody in the congregation what wishes prayer for their families?" asked the colonel minister, "Yasuh," responded Brother Jones. "Ah's a spen'thif 'an' ah throws mah money round reckless like."

"Ve'y well. We will join in prayer for Brothel Jones—jes' after de collection plate have been passed."

The best way to take the cooler weather when it comes is by degree.

FRENCH ENGINEERS TEST BRITISH ENGINE

The new British express locomotive "Cock of the North" which already has set up several new speed records, is shown on its arrival at Calais, near Paris.

Mail For Craig Harbor

Stamp Collectors Patronize Empire's Most Northerly Post Office

Most northerly post-office in the British Empire, the little settlement of Craig Harbor, Ellesmere Island, in the Arctic twilight has perhaps the greatest per capita postal turnover in the world.

Craig Harbor's residential section consists of dwellings which house a total of two Eskimo families. It's downtown, or business district is the combination store, bunk-house and post-office administered by two officers of the R.C.M.P.

Hundreds of letters find their way to the little shack. They all come by the Hudson's Bay boat Nasopie which once a year steers its cautious way-through ice-studded waters to reach the tiny settlement, near the 78th parallel of north latitude.

The police officer who acts as post-master on this one gala day of the year learned long ago what the great influx of letters means. Inside nearly every envelope he finds a return address and a stamped "cover" with a veiled request that he place a cancellation stamp where the lettering will be easily discernible.

With patience and dexterity he sets to work so that eager stamp collectors down south may receive their boomerang letters with that valuable cancellation stamp of the most northerly post office in the empire.

Streamlining Is Old

Clergymen Filed Designs For Patent 69 Years Ago

And now it turns out that this streamlining of which we hear so much about in this speed-mad era is almost 70 years old. It has been discovered that Rev. Samuel R. Calthrop, a clergyman of Roxbury, Mass., filed designs in the patent office at Boston, sixty-nine years ago.

The train had the appearance of one unit, the cars being joined by flexible vestibules. The locomotive had a shovel-like snout, and was completely sheathed, except for the stack—for the streamlining of which we hear so much about in this speed-mad era is almost 70 years old.

Now after nearly seventy years Dr. Calthrop's dream has been translated into fact; proof that there is very little new under the sun.—St. Thomas Times-Journal.

Frogs sleep in the mud during winter.

Germany's trade with British South Africa is showing unexpected gains.

BRITISH CHESS CHAMPION BEATS CAPABLANCA

Our picture was taken during the 15th Annual British Chess Congress at Hastings, and shows the game between Sir George Thomas, British Chess Champion (left) and the world famous J. R. Capablanca, Russian Chess Champion, and his victory was the first any British player ever scored over Capablanca in any tournament.

An Outstanding Tragedy

World Renowned Collapse Of Tay Bridge In 1879

There have been a few outstanding tragedies in the world's history which have photographed themselves on men's minds so that neither time nor circumstances seem able to obliterate them. The Lisbon earthquake, the last day of Pompeii, the loss of the Titanic, these are instances of them. What happened this night in 1879 is yet another.

It is one of those stories which are quickly told yet leave much to the imagination. The necessary facts to bring it to the mind, to conjure up the horror of it, are few indeed. We need only to know that in 1878 the first great bridge over the River Tay, in Scotland, was built. It was nearly two miles long, had 84 spans, and was 80 feet high. One of the wonders of the world at that time, it was destined to stand but a few months.

As this night in 1879 the sun went down in a wreck of scattered clouds. There was a high wind which increased in velocity till it blew with tremendous force, sweeping up the river at incredible speed.

In the blackness of that terrible night a train with its human freight rushed across the bridge, but never reached the other end. In an instant 13 of the great spans were lifted bodily, swayed a moment over the black waters of the river, and then crashed with the train and all who were in it.

Out of time into eternity they went. The world shuddered. So, at that great price, was bought the knowledge whereby a stronger bridge was built.—Ottawa Journal, Dec. 28.

Receives New Titles

Prince Of Wales Has Three Added To Long List

The Prince of Wales received the most extravagant New Year's gift of his life when King George made him an Admiral of the Fleet; a General of the Army and Chief Marshal of the Air Force at the same time.

The award of three such honors to the same person at the same time was unusual and many theories are being advanced to account for it. Some who take an interest in the private lives of royalty suggest that the Prince must have promised to settle down and marry in the coming year and that the King was showering him with honors in return.

Others thought the King had simply taken another opportunity to show his affection for his eldest son, who is one day to become ruler of the British Empire.

In any event the Prince will ascend the throne with virtually all the secular titles any Briton can hope to have. It is already a duke, an earl, a baron, a count, a viscount, a knight, an officer of half a dozen orders of chivalry, a Knight of the Garter, a Knight of the Thistle and Master of the Merchant Navy and Fishing Fleet. It will be nothing unusual for him to find himself suddenly Emperor of India, Defender of the Faith when he becomes King.

Weird Happenings

Strange Phenomena Attracts Attention At Home Of Ontario Farmer

Weird and unearthly happenings at the home of Joseph Quinn, farmer, residing in North Burgess township, about 14 miles from Perth, Ont., have aroused the countryside for miles around. Strange flying through the windows, thrown apparently by no human hand; iron used for pressing clothes walking downstairs of their own volition; a teapot which jumped off the stove into the woodbox; pictures tumbling from the walls without cause, and other mysterious happenings, have focused the attention of the neighborhood.

So serious has the matter become that Ontario provincial police visited the home to investigate. Many persons in the neighborhood vouched for the truth of the happenings.

Experiments conducted in the Catholic University of America, Washington, D.C., tend to prove that smoking dolls man's sense of taste.

Certainly Holds Record

North Bay Man Uses Same Collar Button 44 Years

Northern Ontario does not only hold world supremacy by way of its famous Dionne quintuplets, but now it claims at least a neck lead for ancient collar buttons still in duty.

John Small, J.P., and former North Bay tax collector, announces a record, that makes all former marks fade into the background. He has worn the same collar button for 44 years, and has never once had to search for it under the bed.

Just recently, Mr. Small read of the English champion, who claimed to have worn a five-cent collar button for 35 years. This gave the North Bay man a laugh, for he received his collar button with the purchase of a shirt.

On The Side Of Right

Great Britain Must Shoulder The Responsibilities That Go With Power

It amounts to this: Great Britain must accept the responsibilities that normally go with power, or must see her power destroyed. It is clear that we cannot remain unaffected by any major European conflict; therefore we must take steps to see that no such conflict occurs. No such conflict is likely to occur if the would-be aggressor knows in advance that Great Britain will be on the side of law against anarchy, of peace against war, of arbitration against force.—Vernon Bartlett.

Carried Hot Meal

Baked beans, codfish and potatoes, a typical New England meal, were cooked at Portland, Maine, and still hot, served for supper in Portland, Oregon, the same night. It was the start of the new air express transportation service between northern New England and the Pacific coast.

It is estimated that the oceans of the world would rise 150 feet were the great ice-caps of Greenland and Antarctica to melt.

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Have you had your handwriting analyzed by this well-known graphologist? Join the throng of those who have done so, and learn what your writing tells about you.)

Another batch of extracts from replies mailed this week shows the scope of the interest aroused by this series of articles. Letters are coming in from coast to coast, and in practically every case, a graphological analysis is able to reveal the help that is needed.

Mrs. "Nellie": The outstanding characteristic in your nature is your procrastination. You put off things that demand immediate attention. This is one of the worst of the minor traits and it is one of the most strongly advise you to cultivate more promptitude and decisiveness.

Mrs. J.—Toronto: Have nothing to do with your married man tri-o-d. He is not quite the innocent suitor he pretends to be. I imagine that if you were to have a talk to his wife you would find that he has been chronically neglected her, and that he has always had a passion for other women. Leave him alone, or the day will come when you will be sorry you ever met him. His handwriting is strongly unfavorable.

H.—Winnipeg: By all means take up a course in advanced bookkeeping. You certainly have a talent for this kind of thing, and you will not go wrong in working hard at it. This is one of the most valuable vocations that a young man can embrace.

Mrs. S.—Sarnia: The only thing to do with your husband is to show him that he is merely alienating your daughter by treating her as a school-child. He likes you, and he loves you, and that it is too much to expect that you will be able to rule him with maturity. His writing indicates that he is somewhat domineering, and that he likes to "rule." But he must understand that he cannot rule the lives of his children for ever. And, judging by your daughter's handwriting, she is well able to look after herself.

Mrs. "Weofol": The trouble with you is that you are giving in to your worries too easily. You should be cultivating outside interests, providing as much variety for yourself as possible. To nurse your troubles, and not only that, but to imagine worries that are non-existent, is merely to create a condition, and after all, it is so needless. Take hold of yourself and shake off those nervous convulsions that are gradually encircling your mind. I have written you, suggesting a regimen for you to follow.

Mrs. E.—You are at an age when you are inclined to exaggerate these "lovers' letters" which are so common in love affairs, but time will show that you had nothing to fear, because I am convinced that the young man was sincere when he told you that he loved you, and before long, things will turn out alright again. In any case, you are rather young to feel that your life is blighted, whatever the outcome.

Have you any problems that are worrying you? Do you know what your handwriting reveals? You may be surprised at the revelations. An expert graphologist tells you things about your friends that you did not know. Send specimen of your writing, you want analyzed, stating your name, address, case. Send 10c coin for each specimen, and enclose with 3c stamped addressed envelope to Lawrence Hibbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg. All letters are strictly confidential. Replies will be mailed out as quickly as possible, but please allow at least two weeks for a reply.

Natives Executed Strange Art

Faintest Rock Pictures On Pacific Coast Countries Appear

Pictures, painted on Pacific coast rocks long before the white men trod the shores of Canada, sculpture executed by native hands centuries ago when the Dominion was wilderness, constitute the outstanding Canadian archaeological find in the year just closed.

Indian haunts along the British Columbia coast gave up these secrets to Francis J. Barrow of Sidney, B.C., during a three-months exploration trip.

Painted by his wife, he set out in his 25-foot sailing boat, covering 1,000 nautical miles along the Canadian mainland, in search of pictographs—pictures on rocks—and petroglyphs—sculptures on rock.

Cliffs along the coast bore fruit of his expedition. The pictures, represented men, animals and stars and were painted in red, while sculptures were of men, sea monsters, whales and flat fish, in low relief. Pictures of sailing ships have also been found, but these were believed to have been painted after the paleface penetrated Indian habitats.

Barrow made color sketches, drawings and took photographs of his findings and also made maps of their location, and forwarded them to the archaeologist at Ottawa, who has deposited them in the National Museum of Canada at Ottawa. It is learned, is also considering sending records of his discovery to London, England, the Province of British Columbia and Washington to be deposited in public institutions.

Parent, concluding the recital of his exploits—"And that, my boy, is what I did in the Great War."

Son—"But, Daddy, why did they want so many men beside you?"

The largest bird is the ostrich, which stands nearly eight feet tall and weighs about 300 pounds.

Guard against Rickets with Cod Liver Oil

PLUS
ADDED DIGESTIBILITY

All babies need the anti-rachitic value of Vitamins A and D, found in pure cod liver oil. Scott's Emulsion is rich in these vitamins, PLUS the easy digestibility that results from Emulsification. PLUS the body-building aid of hypophosphites of lime and soda. Pleasant to take, Scott's Emulsion is tremendously more effective.

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur had been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding fence a long way from the Hour-glass ranch house.

Dustin unexpectedly came along and seeing them, stops and talks to Edith. He mentions the Soda Springs dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Carr, his foreman, about his meeting with Dustin, and is warned that Dustin would kill him if he got the chance. Stone and Carr go to Seco to send a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. Carr goes out with Dad Kane to learn the location of his gold discovery and appraise its value. Dad Kane shows Dustin the mine and samples of the rich ore he took from it.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyotl Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

(Now Go On With The Story)

CHAPTER IX.—Continued

"I thought he was tryin' about havin' lost that notebook," he muttered disgustedly. "It's just barely possible that Corse or Gray may have found it. I'll have to find out that. Anyhow Peyotl will never tell what took place up here."

He knew that he was perfectly safe. Though old Kane was fairly well known in Seco yet at times he had been gone more than two years without exciting comment.

"I'm the only one who knows about this find," muttered Dustin. "And it's a cinch now that no one will out about Corse and Gray rustlin' the Hour-glass stuff. Come on, here."

A Law Every
Mother Should
Know and Observe

Never Give Your Child An
Unknown Remedy without
Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this, the finest men know. Made in Canada.

Safety for You and Yours
You can assist others by refusing to accept a substitute for genuine Phillips' Milk of Magnesia. Be true to the interest of yourself and your children—read in the interest of the product in general.

PHILLIPS'
Milk of Magnesia

"Peyotl," he shouted. "Give a hand here."

Together they carried the limp figure to the narrow trench and laid him at rest under the desert stars. Afar a coyote on a distant, wind-bitten ridge sent up a wailing howl as Peyotl slunk off to the fire and shivered over the flames. Two hours later they got their ponies and headed slowly back for the yellowing flatlands under the rising sun.

CHAPTER X.

That telegram from Gerald Keene caused hot debate at the Hour-glass. Old Joe Carr was lifted to the Seventh Heaven of anticipation. The nephew of his old partner, himself half-owner in the ranch, could do no less than help.

He held conference after conference with Carr, and Stone, because of his alleged intimacy with Gerald Keene, was called into those meetings. Plan after plan was disputed by the nerve-eyed old cattle-man.

"I know Dustin's got his knife out for me," he said. "I know his gang of thieves has been stealin' me deaf, dumb an' blind but I got no proof."

"Stone has," said Carr. "Tell him what you told me about searin' Corse and Gray ar-markin' that calf," he said.

Stone told Carr and Carr's face was a study. Finally he rose and shook his finger menacingly under Stone's nose. "You been drawin' our pay," he said. "You been eatin' Hour-glass grub when you ain't no Hour-glass man. You been stealin' cattle you say not a word about it. You tell only my manager and even he keeps it from me. I can't sabs it a-tall."

"I had a darned good reason for only tellin' Carr," said Stone evenly. "And Carr's got a good reason for not tellin' you. I say 'em—yes. The word of one witness will not convict any one. There would be two of them against me. You'd never get anywhere on my evidence alone. We need more than that."

Carr nodded agreement and that agreed Carr took the line on the decenter from the shelf and poured him a gargantuan drink.

"Dog-gone you," he marled. "Between you, you're goin' to bust me."

"Listen to me, Joe Carr."

Carr's face took on a look suddenly. "You an' me's been friends for twenty years. You been tryin' to run your business against a bunch of crooks. You might have done it but for that."

"He jerked a hand out for the decenter. "Stone is playin' as square as he knows. Of course he's green to the cow-country and he don't know a hell of a lot. He brung you in some good dope. We know now that Dustin was keepin' a wagon in the hills with a bunch of men stealin' everything they could find. We know that he was grubstakin' old man Kane. Why? That's what I want to know? That notebook that Gray fogged out of Corse's pocket looks funny to me."

"At that moment Edith came in, flushed from riding, and stood watching them. Carr took the red notebook that Carr had laid on the table; then it went to Stone. Stone found himself wondering about Stone. There was no question of his eternal greenness! The very cows would eat him—yet . . . ? On every occasion when he had been tested he had come out successful. Her puzzled gaze went past Stone to where, on the porch, Red Thom was flicking bits of adobe at a lizard. Then she heard her father speak:

"Now about that notebook we been talkin' of . . . I'll get it!"

He got it from his desk and studied it wordlessly for a full minute.

"Of course old Shammie-skin Kane's a fool," he said. "He's been wonderin' in foot-loose over the ranges for so long that his brains are addled. They get that way sometimes. But I don't believe he's big fool enough to tie himself up with Dustin unless he's got a stranglehold on him. I'd like to find the old fool and find out what he thinks he's found. Let's see . . ."

And again he fell to studying the book.

Is that Dustin knows Shammie-skin's on the trail of somethin' good. . . . Stone snatched the book.

"There's more to it than you've guessed yet," he said curtly. "The man gives rather plain directions here. . . . If we've got sense enough to read 'em. He hasn't given this book to Dustin, probably because he doesn't trust Dustin. Evidently he lost the book and those men Gray and Corse, up in that part of the range stealin' your cattle, happened to find it. Corse and Gray may or may not know what Kane knows. The main thing is . . . Find Kane and also find out, before we find him, what it is he thinks he's got. Let's see the directions again. . . . And he read:

"Red Water canon seven to one to white birch. Up Stinking Water three two to sunk can."

"By God, Frank!" Carr sprang into life. "That sounds like whatever it is, is on Hour-glass land."

"Those are distances," said Stone sharply. "But what's the use as a unit? That's the question. It can't be a hundred-foot tape. I doubt if a prospector carries a watch."

They sat and stared at each other and Edith saw their faces change. From time to time her father and Carr eyed each other but always their gaze came back to Stone. It was pretty clear that for some reason they were depending on this stranger to the Hour-glass. The mere fact that he and he alone had been able to put Carr in touch with Gerald Keene made him of prime importance just now. Stone broke the silence with a sharp exclamation that was half oath.

"Well," said Carr. "Spit it out. What's his job now?"

"How far is it up to that place would you say?"

"Huh. You've been there. I'd say it's about twelve miles. Why?"

"Give me that book and you and Mr. Carr wait here. I want to try a notion of mine. It may not work. I'll be back by night."

Edith rose to her feet with a quick little exclamation.

"I'm going with you," she said quickly. "You don't want to take one of the men of course. Anyhow, they're all out. But I mean to go."

"I know Dustin's got his knife out for me," he said. "I know his gang of thieves has been stealin' me deaf, dumb an' blind but I got no proof."

"Stone has," said Carr. "Tell him what you told me about searin' Corse and Gray ar-markin' that calf," he said.

Stone told Carr and Carr's face was a study. Finally he rose and shook his finger menacingly under Stone's nose. "You been drawin' our pay," he said. "You been eatin' Hour-glass grub when you ain't no Hour-glass man. You been stealin' cattle you say not a word about it. You tell only my manager and even he keeps it from me. I can't sabs it a-tall."

"I had a darned good reason for only tellin' Carr," said Stone evenly. "And Carr's got a good reason for not tellin' you. I say 'em—yes. The word of one witness will not convict any one. There would be two of them against me. You'd never get anywhere on my evidence alone. We need more than that."

Carr nodded agreement and that agreed Carr took the line on the decenter from the shelf and poured him a gargantuan drink.

"Dog-gone you," he marled. "Between you, you're goin' to bust me."

"Listen to me, Joe Carr."

Carr's face took on a look suddenly. "You an' me's been friends for twenty years. You been tryin' to run your business against a bunch of crooks. You might have done it but for that."

"He jerked a hand out for the decenter. "Stone is playin' as square as he knows. Of course he's green to the cow-country and he don't know a hell of a lot. He brung you in some good dope. That notebook that Gray fogged out of Corse's pocket looks funny to me."

"At that moment Edith came in, flushed from riding, and stood watching them. Carr took the red notebook that Carr had laid on the table; then it went to Stone. Stone found himself wondering about Stone. There was no question of his eternal greenness! The very cows would eat him—yet . . . ? On every occasion when he had been tested he had come out successful. Her puzzled gaze went past Stone to where, on the porch, Red Thom was flicking bits of adobe at a lizard. Then she heard her father speak:

"Now about that notebook we been talkin' of . . . I'll get it!"

He got it from his desk and studied it wordlessly for a full minute.

"Of course old Shammie-skin Kane's a fool," he said. "He's been wonderin' in foot-loose over the ranges for so long that his brains are addled. They get that way sometimes. But I don't believe he's big fool enough to tie himself up with Dustin unless he's got a stranglehold on him. I'd like to find the old fool and find out what he thinks he's found. Let's see . . ."

And again he fell to studying the book.

HINDS'

Prevent this
Do this

How much of those things which thou shalt suffer . . . Ye shall have tribulation ten days; be thou faithful unto death and I will give thee a crown of life." Revelations 2:10.

Then O my soul be not afraid. On Him thou thee and all things made. Do thou all calmly rest: Whatever may come, whatever may be. Our Father in the heavens must know in all things what is best.

Guide me O Lord in all changes and varieties of the world, that in all things I shall appear in Him the successor of the martyred All—New York Times.

THE RHYMING
OPTIMIST

By Aline Michaels

TWILIGHT

This is the loneliest, loveliest hour; With dying day a fading flower; In twilight things recede, grow dim. As slowly on the senses sweep Strange shapes and sounds of other world.

And music, not from earthly hands. And sunlight slanting through the wood. Show it in strange theistic mood; The very trees that heard our vows. Thrill with sunset in its boughs. And surely from no feathered throat Came that prolonged and poignant note!

This twilight world is one wherein All things might be that have not been; That light we dreamed, that smile we sought. Is in this hour snared and caught.

Ask About The Babies

Dionne Quintuplets Attracting Great Interest In U.S.

Fame of the Dionne quintuplets has even over-shadowed domestic affairs in the United States. Premier Mitchell F. Heburn, of Ontario, told newspapers in Toronto. Even the West Indies they showed great interest in the five Callander babies.

"As soon as they found out I was from Ontario they asked about the babies," Mr. Heburn said. "They talk more about quintuplets than the affairs of state."

Mr. Heburn said Dr. Allan Roy Dufoe, the quintuplets' physician, made a splendid impression on the United States public during his recent visit there.

A One-Man Strike Halts Job

A one-man strike has tied up a \$260,000 project for the construction of a viaduct at St. Louis, Mo. The man, a holding engineer, was called off the job by his union, which objected to the use of gravel from a company which, it said, does not employ union men.

Choice Of Three

"Brethren," said the colored parson, "I has with me dis mornin' a five dollar sermon, a two dollar sermon and a one dollar sermon. I is goin' to take up de collection to see which one of dem you can afford to hear. You gits out ob de church just as much as you puts in."

Fire Prevention Awards

Five Saskatchewan Cities Reach High Grade

Activities of fire prevention week in Canadian cities reached a high degree of efficiency. George F. Lewis, deputy fire marshal of Ontario, said in announcing 1934 awards. Keen competition was shown among fire departments and municipalities throughout the country. Saskatchewan was particularly prominent with five cities of 25,000 population and less taking gradings of more than 90 per cent.

R.C. Taxation

Taxation in British Columbia will probably be unchanged in the 1935 provincial budget and readjustment of municipal grants will be delayed until after the provinces and Dominion have a re-examination of taxation rights and jurisdiction. Premier T. D. Pattullo indicated.

Rules Moslem World

Agas Kahn Is Most Cosmopolitan Personage in World

Religious leaders do not figure prominently in the news about the Derby, the St. Leger or the Cesarewitch. The thing happens so rarely, in fact, as to constitute the distinction of just one person in the British Empire. He is The Aga Khan, and the picturesque name belongs to a colorful individual. London reports speak of a peerage about to be conferred on him.

Whenever the papers in this country mention The Aga Khan they are careful to identify him as "the spiritual leader of millions of Mohammedans in Asia and Africa." He is the head of the Ismaili sect, being descended from Fatima, daughter of Mohammed and wife of Ali. As such his influence is great in the Moslem world and it has been recently conferred on the side of Great Britain. Some of his ancestors ruled as caliphs of Egypt. In another direction he is descended from the ancient kings of Persia. He goes back to Darius, Xerxes and beyond.

He is the most cosmopolitan personage in the world today. For this spiritual leader of millions of Moslems is usually depicted in the act of leading in the winner at one of the big English races. In 1930 he won the Derby at Epsom. He is the husband of one of the ten best married women in the world. He married her a few years ago when he was a young Parsian milliner. He lives most of the time in France and England, but when he goes to India he is accompanied by him the successor of the martyred All—New York Times.

"Did you work for Mr. Keene at the garage?"

"For a while, yea'm."

"Don't say 'Ma'am' to me," she said sharply.

"What'll I say then?"

"You might try 'Edith,'" she laughed. "Most of the others do."

"All right 'M.' I mean Edith."

"They both pocketed and let go of that and they let their horses out over the level. That long, treeless mesa swept away in mile after mile of pleasant grass-land dotted here and there with stunted mesquite and fire-tipped ocatilla and it pitched slightly up till this hedge was cut by a deep canon. Red Water canon that took its name from the discoloration of the stream due to some iron deposit.

"Up Red Water to Stinkin' Water . . ."

"Funny names they gave the places," muttered Stone.

"Edith knew them well and was versed in the legends of the land. They call the next deep valley Stinking Water because of its sulphur springs. The Indians named it many years ago. Even sheep won't drink the water there."

Here we are in Red Water canon. Now what?"

Their ponies paced at the yellowed soil and scornfully nosed aside the water in the shallow pools.

"Up the valley seven or eight miles," said Edith. "To a white birch . . . Then up Stinkin' Water three two to a sunk can."

(To Be Continued)

Dates Are Conflicting

As To When First Appendicitis Operation Was Performed

The first operation for appendicitis was performed fifty-two years ago in Davenport, Iowa, by Dr. William W. Grant.

—Or was it?

That handy little volume, "Famous First Facts," says so one page, and on the very next page raises the date with itself by saying:

"It is also claimed that the first appendicitis operation was performed by Dr. R. J. Hall, Dr. Sand's assistant, at Roosevelt Hospital, New York, in May, 1886."

"Who's Who in American Medicine" gives Dr. Grant credit for the first "successful" appendectomy, but the date given is January 4, 1885—that would be an even half century ago.

Dr. Lago Galston, of the New York Academy of Medicine, usually called on by the papers to solve such perplexities, had more "first" dates to offer.

France, according to his records, put forth a claim to the first appendicitis operation in 1759.

The first record of the operation in England was one performed by Dr. James Parkinson—one of the most notable physicians of his time—in 1812. But that one wasn't successful. The patient died.

Five Saskatchewan Cities Reach High Grade

Activities of fire prevention week in Canadian cities reached a high degree of efficiency. George F. Lewis, deputy fire marshal of Ontario, said in announcing 1934 awards. Keen competition was shown among fire departments and municipalities throughout the country. Saskatchewan was particularly prominent with five cities of 25,000 population and less taking gradings of more than 90 per cent.

R.C. Taxation

Taxation in British Columbia will probably be unchanged in the 1935 provincial budget and readjustment of municipal grants will be delayed until after the provinces and Dominion have a re-examination of taxation rights and jurisdiction. Premier T. D. Pattullo indicated.

Meek—My wife said that I was to ask for a raise, sir.

Meeker—All right. I'll ask my wife if I may give you one.

Ornithopters are flying machines with flapping wings, or movable planes.

DON'T RISK BAKING FAILURES . . .

"DON'T TAKE CHANCES WITH INFERIOR BAKING POWDER. LESS THAN 1/4 WORTH OF MAGIC MAKES A FINE, BIG CAKE, AND MAGIC ALWAYS GIVES GOOD RESULTS."

MISS ETHEL CHAPMAN, popular cookery editor of The Farmer.

Leading Canadian Cookery Experts warn against trusting good ingredients to inferior baking powder. They advise MAGIC Baking Powder for perfect cakes!

CONTAINS NO ALUM.—This statement on every tin is a guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

Little Helps For This Week

"Fear none of those things which thou shalt suffer . . . Ye shall have tribulation ten days; be thou faithful unto death and I will give thee a crown of life." Revelations 2:10.

Then O my soul be not afraid. On Him thou thee and all things made. Do thou all calmly rest: Whatever may come, whatever may be. Our Father in the heavens must know in all things what is best.

Guide me O Lord in all changes and varieties of the world, that in all things I shall appear in Him the successor of the martyred All—New York Times.

THE RHYMING
OPTIMIST

By Aline Michaels

TWILIGHT

This is the loneliest, loveliest hour; With dying day a fading flower; In twilight things recede, grow dim. As slowly on the senses sweep Strange shapes and sounds of other world.

And music, not from earthly hands. And sunlight slanting through the wood. Show it in strange theistic mood; The very trees that heard our vows. Thrill with sunset in its boughs. And surely from no feathered throat Came that prolonged and poignant note!

This twilight world is one wherein All things might be that have not been; That light we dreamed, that smile we sought. Is in this hour snared and caught.

Ask About The Babies

Dionne Quintuplets Attracting Great Interest In U.S.

Fame of the Dionne quintuplets has even over-shadowed domestic affairs in the United States. Premier Mitchell F. Heburn, of Ontario, told newspapers in Toronto. Even the West Indies they showed great interest in the five Callander babies.

"As soon as they found out I was from Ontario they asked about the babies," Mr. Heburn said. "They talk more about quintuplets than the affairs of state."

Mr. Heburn said Dr. Allan Roy Dufoe, the quintuplets' physician, made a splendid impression on the United States public during his recent visit there.

A One-Man Strike Halts Job

A one-man strike has tied up a \$260,000 project for the construction of a viaduct at St. Louis, Mo. The man, a holding engineer, was called off the job by his union, which objected to the use of gravel from a company which, it said, does not employ union men.

Choice Of Three

"Brethren," said the colored parson, "I has with me dis mornin' a five dollar sermon, a two dollar sermon and a one dollar sermon. I is goin' to take up de collection to see which one of dem you can afford to hear. You gits out ob de church just as much as you puts in."

Fire Prevention Awards

Five Saskatchewan Cities Reach High Grade

Activities of fire prevention week in Canadian cities reached a high degree of efficiency. George F. Lewis, deputy fire marshal of Ontario, said in announcing 1934 awards. Keen competition was shown among fire departments and municipalities throughout the country. Saskatchewan was particularly prominent with five cities of 25,000 population and less taking gradings of more than 90 per cent.

R.C. Taxation

Taxation in British Columbia will probably be unchanged in the 1935 provincial budget and readjustment of municipal grants will be delayed until after the provinces and Dominion have a re-examination of taxation rights and jurisdiction. Premier T. D. Pattullo indicated.

Meek—My wife said that I was to ask for a raise, sir.

Meeker—All right. I'll ask my wife if I may give you one.

Hunter's Paradise In B.C.

Expert Furrier Wants World To Hear About It

"British Columbia is the hunter's paradise. It affords the greatest sport in the world. But we must get busy and advertise it."

In these words, G. L. Pop, expert furrier, climaxed an address to the Lion's Club in Vancouver.

Mr. Pop's address was throughout marked by pride in British Columbia and appreciation of the great opportunities this province has to offer sportsmen. He argued that efforts be made to attract to this province big game hunters from all over the world.

He urged that citizens co-operate with the government and tourist agencies to aid in bringing big game hunters and sportsmen.

Illustrating his lecture with slides, Mr. Pop took his hearers through the big game centres of the province, demonstrating that British Columbia held a premier place in affording sport to hunters.

He stressed the economic aspect of the development of the province as a vast sportsman's paradise.

Airmen of Britain will publish their own magazine.

Calgary Man Walked To West Sixty Years Ago

C. J. "Con" Duggan, at 90, recalls how he walked to western Canada from northern Ontario 60 years ago. Wading through creeks and muskeg, tormented by blackflies and mosquitoes and practically without food, he arrived at Fort Garry, now Winnipeg, 20 days after leaving Thunder Bay at the head of the lakes.

He travelled the "Dawson route," made famous by Col. Wolesey's journey to quell the Red river rebellion in 1870, and used only once after Duggan's historic journey. He still had a ticket for which he paid \$10. On it is inscribed:

"Red river route, No. 241, department of public works, Canada. Depot: Thunder Bay, L.S. June 17, 1870."

Asked to C. J. Duggan for one passage ticket from Thunder Bay to Fort Garry. (Signed) M. J. Carpenter and Co.

The party, consisting of 26 persons, had two teams and wagons, but this means of transportation was only sufficient for their baggage.

Value Of Good Reading

Character Of Children Formed By Properly Selected Books

The children's library is a safe-guard against many undesirable attractions offered to juveniles. Canon Allan P. Shatford said in an address at Montreal. The "funnies" and the time had their place, the speaker declared, but the child brought up on these would never develop the type of personality fostered by the reading of properly selected books.

One of the most valuable features of the library system, Canon Shatford believed, was the voluntary character of the reading, which had a lasting effect.

Compulsory reading was soon forgotten. The reason many people disliked the Bible was they had been compelled to read it in childhood. "If you want to condemn a book," he added, "just compel a child to read it. I am satisfied that in the long run these libraries will have a greater effect on a child's life than anything he is obliged to do in day school."

England To India Afoot

From England to India afoot is the goal of young William Holder, Englishman, who left Belgrade for Tirana after spending a few days in the city. Holder has a job in India near Afam on a plantation, but the job will not be ready until 1936. Without money the Englishman started from London, sleeping in his small tent which he hitched on the outskirts of Belgrade.

Wax Grown On Trees

Wax is grown on trees by Chinese farmers, who have utilized the wax-making properties of a small Chinese insect. This insect spins cocoons of pure wax, and its masters have learned how to make it produce enormous quantities of the material.

It is estimated that 85 per cent of the wealth of the United States is derived from or involves patented articles. There are some 2,600 patents in the country today, earning on the average of \$150,000 a year.

WOMAN HELD ON MURDER CHARGE

Myram, Alta.—Mrs. Smoliak is now held on a murder charge along with Skrut, hired man, in connection with the killing of her husband. Mr. Smoliak was killed last month when he was shot in his farm home while playing cards. Skrut confessed to the murder and implicated Mrs. Smoliak as the one who lured the killing. Skrut's confession was entered as evidence at the preliminary hearing, when he appeared as a Crown witness against Mrs. Smoliak.

THE BONSPIEL

With twelve outside rinks and eleven locals entered, the Annual Bonspiel of the Lacombe Curling Club opened on Tuesday. The ice during the day was soft, and made good curling strenuous, but before night it tightened up and good curling weather has been experienced to time of writing.

Some well contested games have featured the 'Spies, and John Gilmour's rink has come through the competitions so far undefeated.

With the exception of the Person's Trophy, which was won by John Gilmour defeating Welliver, of Red Deer 12-3, none of the competitions are finished, but it is expected the remaining games will be played off on Friday.

There was a good attendance and great interest shown by visitors all through the Bonspiel.

VARITY WINS GAME BY SLIGHT MARGIN

A large crowd of fans saw Varsity win from Lacombe Wednesday night by the small margin of one goal, the score being 2 to 1. The Edmonton team had been playing senior hockey all winter and were a much heavier team than the locals. Aside from the first period, when Lacombe team played a defensive game, our team had most of the play. Our boys seemed a lot faster than Varsity and had luck prevented several almost certain goals. Open nets were missed several times by our boys, who appeared over-anxious.

Gordon Craigie played a wonderful game in goal and certainly handled the dangerous shots nicely. Stan Wilson and Bob McLaugherty played better hockey Wednesday night than they have for some time. They were great and certainly showed plenty of speed.

Fennan got our lone counter on a nice play. He beat the defence and bored right in on the net. He took no chances on shooting but stick handled around the goalie and placed the puck squarely in the net. Lacombe goes to Edmonton Saturday night and we anticipate a win for our team. With larger ice, our boys should travel a lot faster. We believe our boys showed just as much speed if not more than Varsity.

HORSE TRADE TAKES ON SPRING ACTIVITY

In addition to the horse sales that are planned for this Spring, there are a number of buyers busy in all parts of the province, who are looking for horses to ship east.

Several of the buyers say they are ready to pay about the same prices as last year.

Where farmers have horses that they can hold and fit for the organized sales that are being planned in various parts of the province, it will probably pay them better to get the horses in good condition and wait until there is competitive buying in the big sales.

The Annual Meeting and Election of officers of the Lest. We Forget Club will be held in the Town Hall on Wednesday, February 20 at 8 p.m.

BRUNO HAUPTMANN TO GO TO ELECTRIC CHAIR

Bruno Richard Hauptmann was found guilty of the kidnapping and murder of baby Lindbergh and was sentenced to die in the chair on March 18th. The trial which lasted over six weeks ended Wednesday night. Notice of an appeal has been filed by Attorney Kelly, defence lawyer, which automatically gives a stay of execution until the May session of the courts.

TO ORGANIZE HORSE CLUB

A meeting of all interested in the formation of a Horse Club, with the stallion "Huxley Mac" 4668, will be held in the Town Hall, Lacombe, on Saturday afternoon, February 22, at 2.30. This stallion is a grand animal and is owned by Blakely Bros', Red Deer.

NOTICE TO FARMERS

Farmers in this municipality are requested to notify the Secretary E. Walter Simpson of the approximate amount of feed they will require to carry through the season. This survey is being made at the request of the Department of Agriculture.

DRESSMAKING

Miss Hazel Christie is prepared to do dressmaking of all kinds, at her home, or will go out if required. Reasonable prices. Call at D. I. Perkins, corner Hamilton Ave., and Edmonton Trail.

SAGE WINS AT SYLVAN LAKE

"Bill" Sage took his rink, composed of Joe Taylor, Duke Parsons and Mel Parsons to the Sylvan Lake Bonspiel this week, and of the twelve outside competing rinks was the only combination to win any of the competitions, taking first place in the Eaton Trophy.

The new Chevrolet and Oldsmobile will be on display at Laird Motor's show rooms on Saturday. Come in and see these new cars.

INCREASE

84.21% more Salada Tea was sold in Western Canada in 1934 than in 1933. Public preference for finest quality tea made this huge increase possible.

'SALADA' TEA

Putting the World Together Again

A new book recently issued under the title "Courage For To-day" begins with a little story that has a lot of meaning in it. A man gave his small son a very elaborate jig-saw puzzle. It had been made by tearing a map of the world into little pieces. In a short time the child reported that the picture of the world was all put together. "How could you have done it so fast?" asked the father in amazement. "Oh, it was easy," answered the child. "You see, there was a picture of a man on the other side. When I put him together, the world was put together, too."

Men, and parties, and governments are all trying to put this world together again. The number of plans and theories and policies advocated as the only way in which this gigantic task can be accomplished are beyond computation or classification. Speeches term with suggestions of all kinds, newspaper and magazine articles flow in an uninterrupted stream from the printing presses, books are piled upon books, all presenting the speaker's or writer's idea of the particular thing that must be done. To-day's brilliant suggestion is completely destroyed by to-morrow's contribution until practically all of us are in a fog.

Men of prominence, leaders of their fellow men, change their views over night and to-day are found denouncing that which they vigorously upheld and championed yesterday; whole nations almost in the twinkling of an eye abandon policies and forms of government which for scores of years, even centuries, have been accepted as traditionally sound and wise. One group declares that mankind must retrace its steps backward to the tribal communal state and so they declare for Communism. Another group says man must be deprived of those personal liberties won by him through centuries of struggle and must be regimented, controlled and ordered like private in an army and be made to surrender all hope or right to profit above a standard form of living which may result from his individual initiative and efforts, and this group declares for State Socialism. A third group holds these other groups to be all wrong and adheres to the view that man is incapable of self-government, that democracy is an abject failure, and that only a selected few are wise enough, strong enough, capable enough to govern, and that they should take full control into their hands, and retain it by force if and when necessary, and impose their will and ideas upon all others. They declare for Fascism and dictatorship.

Each and all of these groups fail to recognize and learn the simple lesson which the small boy with his jig-saw puzzle so quickly demonstrated, namely, that if man himself is made right the world itself will be righted. Business in the hands of dishonest men will be dishonest business, and its mere transfer from private to governmental control, whether Democratic, Communist, Socialist or Fascist, will not make business honest. There has been as much, if not more, graft and corruption, and just as many mistakes made, if, indeed, not more, under governments as there have been in public business. Private business has corrupted and bedeviled governments, but, so too, have governments corrupted, bedeviled and destroyed private business and made huge and costly blunders. In fact, governments, supported, even driven by their people, are more responsible for the present ills of the world than is private business as now constituted.

And who is responsible? Many an honest business man has been forced to adopt unethical, even dishonest practices, because his customers have demanded it of him. The same is true of high principled men entrusted with the duties and responsibilities of government. A government adopts a policy in the general public interest, it imposes a tax for the necessary purposes of government, and the average man and woman cudgel their brains to find ways and means of evading the tax and escaping their responsibilities. One person smuggles, another escapes paying Customs duties, another swears to a false affidavit to avoid paying a gasoline tax, still another "doctor" an income tax return, and so it goes.

Completely changing the system will not effect a cure; it is man himself who must change. It is the human factor that is wrong, and until it is made right there will continue to be dishonesty and wrongs no matter what the system may be, and the larger the degree of power placed in the hands of a few the greater the wrongs will be because the greater the power the greater the opportunity for evil, and because the possession of power always leads to the grasping for more power regardless of the methods whereby it may be obtained.

Governments are created to govern a country; not to usurp the rights and destroy the liberties of the people. People should control and direct their governments; not the government control and direct the people. It is the duty and responsibility of governments to check and control the dishonest and eliminate wrongs and abuses imposed by individuals or groups of individuals upon others. That is the function of governments acting in the interests of all, but it is not a proper government function to interfere with or usurp the rights of individuals in the proper ordering of their own lives and in the carrying on of their legitimate occupations.

The inalienable rights of man are life, liberty and the pursuit of happiness. Life is more than money and business; liberty is more than a regulated mode of existence and a stated standard of living; the pursuit of happiness must be left to the individual otherwise he cannot be happy. God conferred on man a mind and will of his own, and man must work out his own salvation, and, aided by such institutions as he may himself devise and set up to assist him, through education and otherwise, rise to higher things and nobler conceptions.

Politicians, financiers, economists, social workers—all must come to a realization and acceptance of the fact demonstrated by the small boy's jig-saw puzzle, namely, that the speediest way to put this old world together again is to put man himself together as a Divine Creator intended him to be.

The Black Forest, or Schwarzwald, of southwestern Germany, has an area of 1,800 square miles. It is a favorite spot for tourists, and derives its name from the dark use of the fir that grow in the region.

Twenty-one of the 48 United States have ocean frontage.

Radio listeners in Japan are being taxed 25 cents a month.

Seed Oats Are Scarce

Drouth And Early Frost Has Menaced The Visible Supply
P. W. Townley-Smith, of Lashburn, national vice-president of the Canadian Seed Growers' Association, was re-elected president of the Saskatchewan branch of the association at the annual convention held at the University of Saskatchewan as growers learned that combined effects of drouth and early frost had seriously menaced the visible supply of seed oats. So severe was the harm done to crops last summer that ordinary seed might carry as many as 40 wild oats to the pound and the association discussed the lowering of germination percentage required in registered seed.

Unless some reduction was allowed in the germination percentage required for registered oats, much of this high-grade seed might fail to make the grade and the pure seed touched by the frost fall into the common class, it was pointed out. Authorities have suggested lowering the required germination to 80 per cent. for No. 1, 75 per cent. for No. 2, and 65 per cent. for No. 3, the same percentages as for commercial seed. The matter was left to the C.S.G.A. executive.

SHE PLAYS ORGAN AT 75 YEARS

Takes Kruschen To Keep Rheumatism Away

Writing to tell how she keeps her activity, this wonderful old woman states—
"My hands were becoming so crippled that I had to give up piano and organ playing—and almost entirely gave up knitting. I have been using Kruschen Salts for nearly two years, and am very pleased with the result. Last August I played two church services on the organ, and hope to do so again this August. My fingers are nearly straight, and quite supple, and I am 75. I have recommended Kruschen Salts to many people."

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid, and the removal of poisons which undermine the health.

National Fund To Combat Cancer

25th Anniversary Of The Accession Of The King To The Throne To Be Commemorated
Canada will commemorate the 25th anniversary of the accession of the king to the throne in May by the establishment of a national fund to assist in combating cancer.

Following a statement announcing the fund was made public: "His Majesty The King, in response to a request from His Excellency the Governor-General, has graciously consented to the inauguration of a national fund to commemorate the 25th anniversary of His Majesty's accession to the throne. It is understood that this fund will be devoted to the campaign against cancer in Canada, and that, by special permission of His Majesty, it will be named The King George V. Silver Jubilee Cancer Fund for Canada."

Krupp Works Prosperous

Business Good Last Year And Employees Get Bonus
So well did the famous Krupp works of Essen in Germany do last year, the employees have been granted a bonus. Workers and craftsmen will get from 10 to 40 marks; clerical employees will receive from 10 to 25 per cent. of their monthly pay. The bonus is a form of profit-sharing with the company distributing the extra cash to all workers. The Krupp organization is the famous armament firm of Germany. Evidently things are looking up in their line—Border Cities Star.

Color Does Not Matter

The color of honey which varies from water-white to a very dark brown does not affect its food value in any way. The difference in color is caused by the absorption of light in varying degrees by certain substances in the nectar of the different flowers.

A Resourceful Man

Forgetful Husband (to friend)—I want you to help me. I promised to meet my wife at one o'clock for luncheon and I can't remember where. Would you mind ringing her up at our house and asking her where I am likely to be about that time?

INFANTS' COLDS Relieved!

Young children easily catch cold. From Mrs. Russell W. of West Beach, Ont., wisely says: "If I could give Baby's Own Tablets to my children, I would. They are a great help. I have used them for colds, coughs, and all the little troubles that come to children. They are safe and sure in relieving childhood's common ailments." Price 40c.

CHILDRENS COLDS

PROVED BY 2 GENERATIONS

Pledged To Advertise

Chicago Hotel Has Clause In Lease For Tenants
To secure a store in the Palmer House, Chicago, one must not only be financially able to pay the rent but must advertise sufficiently to satisfy the owner of the property. This is one of the oldest lease transactions which have come to light in recent years. Every merchant who obtains a store in the Palmer House, it is understood, will have to agree to advertise. These leases are arranged on a percentage basis, based on the gross business of the tenant. The more business the merchant does the more rental he will pay. To make sure that the tenant will do a maximum business, the Palmer House agents have hit on the idea of advertising and in the lease signed last week the renter has agreed to spend a percentage of his earnings of his business for newspaper advertising. None but an aggressive merchant will agree to this form of lease.

Will Last Indefinitely

Pension Scheme For Titanic Sufferers Still In Existence
It is 22 years since the Titanic was wrecked and the London newspapers report that 276 persons are still getting relief from the fund that was started in 1912. This Mansion House fund totalled \$415,212, and the annual disbursements vary from \$15,000 to \$20,000. A large number of the beneficiaries were children or old people. Many of the latter have since died and the children have grown up, yet the pensions continue. In theory, the aim of the administrators is that the last beneficiary shall receive the last money available on his or her death, but the fund will cover, if necessary, the next 50 years, almost three-quarters of a century after the tragedy. This seems to be another proof that when a pension scheme is started, there is no end to it—Montreal Gazette.

Something Can Be Done

Several Ways Motor Car Accidents Could Be Reduced
Reports of the 1934 motor car casualties indicate that between 35,000 and 36,000 persons were killed and nearly a million were injured in 900,000 accidents. The figures are like those of war.

"Terrible!" exclaims the reader, "but what can we do about it? We may do away with war but we certainly aren't going to do without automobiles!"
True, but may we not overdo this what can we do about it? attitude? The better frame of mind for the public is, "Something must be done about it!"

Something can be done to remove known road hazards and to make sure that machines that are unfit to drive are kept off the highways—Detroit News.

To Protect The Public

Maximum Speed Rate For Motorists In England To Be Thirty Miles Per Hour

A maximum speed of 30 miles an hour for all vehicles in England after March 18 was ordered by the government recently.

In addition, city traffic measures now in effect in London for the protection of pedestrians will be extended to the rest of the country. In London shining rail-heads or colored lines are kept off the highways to be used by pedestrians. Traffic signals consisting of black-and-white posts, surmounted by bright orange-colored lights, will be erected in many places.

There Is Another

The Border Cities Star says: "Every man on the street," City Solicitor Bruce J. S. MacDonald tells the Lions Club, "thinks he could step into public office and handle the job better than the man who is in it. It is the only business I know where that attitude exists." Ah, but there is another man, Mr. MacDonald. It is the newspaper business.

No "male witches" have ever been convicted in America and very few in England.

Chemists have succeeded in coloring wallpaper so that it will not be faded by light.

Western North America's dark grow is mostly white.

Canadian Boy Scouts Active

Eighty Thousand Children Supplied With Christmas Toys
Eighty thousand children were supplied with Christmas toys through a chain of 150 toy shops operated across Canada from coast to coast by Canadian Boy Scouts. Since their inception eleven years ago Canadian Boy Scout toy shops have collected, repaired, repainted and distributed nearly two million toys to over half-a-million Canadian children. In many centres scarcity of old toys this past year caused the Scouts to try their hand at making new ones, and whole-sale quantities of new wagons, trucks, tractors, racers, doll bedroom sets and other toys to delight the childish heart were added to Santa's pack.

Thousands of family parcels of toys were sent to settlers rehabilitated in Ontario and Quebec by government and municipal back-to-the-land schemes, and to new homesteaders in Northern Saskatchewan. Heavy bulk shipments of toys were made by eastern scout toy shops to assist children from the West to carry on the good work. In addition, Scouts in the East distributed thousands of playthings among the children of their own districts who might otherwise have been overlooked. Toys were not the only medium for Scout good turns at Christmas. In several centres, mostly in the eastern provinces, the boys conducted "relief barrel" campaigns. Large barrels were placed in grocery stores with signs inviting customers to purchase one extra article and place it in the barrel for distribution to the needy at Christmas. Thousands of hampers of food were provided in this manner. In one centre Boy Scouts sold apples on the streets and with the proceeds bought hampers for needy families. In another they sponsored a theatre matinee for children to which the price of admission was one article of canned food, and the receipts were used for Christmas distribution.

Married Men Live Longest

Death Rate Shown To Be Much Lower Among The Beneficiaries

It's the married man—not the bachelor—who lives longest. Not only lives longest, but is less likely to do his living in the poor house.

Professor Edwin S. Burdell, of the department of economics and social sciences at the University of Toronto, is author of those observations—those said a few more.

For instance, Professor Burdell tells us fewer married men commit crimes and fewer go insane.

The death rate, he says, is much lower among the married than among the unmarried. The same is true for the married than for the single. "Marriage is the best insurance in the world—insurance against crime, insanity, poverty, and premature death. The bachelor hasn't the social responsibility of the married man. As a rule, he is answerable only to himself. Therefore, when he is tempted to commit crime there is not the deterrent of thought of consequences."

Investigate Oil Drifting

Committee Appointed To Study Causes In Alberta

To investigate oil drifting in Alberta, a committee has been appointed by Hon. P. S. Giradale, minister of agriculture, with the following personnel: O. S. Longman, field crops commissioner; E. L. Gray, deputy minister of municipal affairs; Dr. F. A. Wyatt, professor of soils, University of Alberta; M. L. Fregg, district agriculturist, Lethbridge; A. E. Palmer, Dominion experimental farm, Lethbridge; L. Koolie, Monarch; Jesse Strang, Carleton Place, and A. C. B. Grenville, Montreal. The last three are farmers who have had experience with soil-drifting.

The committee is to make a thorough study of the causes, effects, and remedies of the soil-drift menace, which has worried Alberta farmers in recent years, and will make recommendations to the minister, advising methods for dealing with the situation.

Maybe those who have nothing to worry about have nothing to worry with.

An automatic road set starts itself in the morning and runs a pre-selected schedule.

An electric eye is being used in Massachusetts to count automobiles. It ignores pedestrians.

Helium gas, hitherto believed to be a monopoly of North America, has been found in Bulgaria.

Sign in a San Francisco cafe: We know that your check is good, but we don't trust the banks.

ARE YOU WEAK?

Mrs. W. Bowman of Ont. said: "I had lost weight through poor nutrition, I had backaches and headaches and felt miserable. I took Dr. Pierce's Golden Medical Discovery and was soon enjoying excellent health." All druggists. New also, tablets, 10c. Price \$1.00. Large size, tablets, 10c. Price \$1.00. For free medical advice.

NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!

Crush and stir a Aspirin tablet in a third of a glass of water.

Gargle thoroughly—throw head way back, allowing a little to trickle down throat. Repeat 2 or 3 times mouth.

If you have signs of a head or chest cold take 2 Aspirin tablets—drink a full glass of water. Repeat in 2 hours.

Rowness, Irritation Go at Once

Note Directions for New Instant Treatment

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir 3 Aspirin tablets in 1/4 glass of water and gargle with it twice.

Aspirin tablets disintegrate so completely no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this fundamental treatment instead of less effective old-time "washes" and "antiseptics." Remember this. And when you buy, see that you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

Dominion Government Carries Medical Aid To Arctic And Sub-Arctic Areas

The provision of medical care for the native inhabitants of the Northwest Territories is a responsibility of the Dominion government. For thousands of miles along the Arctic coast of the Dominion, in fair weather and in foul, government medical officers bring their healing art to the aid of our Eskimo citizens. While inland, Indians, half-breeds and indigent whites are also given medical aid. Winter and summer patrols of hundreds of miles are not unusual and nearly every mode of transport known to the north country—airplane, mechanical motor boat, canoe, and dog-sled—has been used to extend the service.

In all eight doctors are employed in this work. Dr. J. A. Ureghar, stationed at Akivik in the delta of the Mackenzie river, is Canada's northernmost practitioner while other doctors are stationed as follows: Dr. A. G. MacKinnon, at Pangnirtung, Baffin Island; Dr. J. M. Morrow, at Fort Smith; Dr. L. D. Livingston, at Chesterfield on the west coast of Hudson Bay; Dr. T. G. E. Byrnes, at Camovay Bay, Great Bear Lake; Dr. C. Bourget, at Resolution, Great Slave Lake; Dr. P. W. Head, at Good Hope, on the Mackenzie river; and Dr. W. A. M. Truesdell, at Simpson, near the junction of the Liard and Mackenzie rivers.

As the department primarily responsible for the administration, including the care of the Eskimos, of Canada's vast northern possessions, the Department of the Interior of

Say Women Have Larger Feet

More Healthy Conditions Of Life And Games Believed To Be The Cause

A woman is believed to have the biggest feet in Britain. She lives at Durham—and she takes size 21 in shoes—the same size as Primo Carnera, the boxer.

Her shoes are 18½ inches long and they have to be made on special lasts. The toe part alone is nearly five inches long.

But this woman does not hold the world record for big feet. That is held by a 15-year-old boy who lives at St. Louis, U.S.A. He takes shoes size 35.

Locally known as the "boy mountain," he stands nearly eight feet high and weighs 25 stone 12 lbs.

Mainly the average size of women's feet is getting larger, according to a London shoe specialist.

It is now quite usual for 13-year-old schoolgirls to take sizes 6 or 7 while their mothers take size 4.

More healthy conditions of life and games are believed to be the cause of girls' feet becoming larger. Among boys there is no appreciable increase in size over pre-war figures.

Big feet usually mean strong ankles—which are essential for good skating—so if the present craze for ice skating continues women will not mind if their feet grow larger.

Eclipse Of The Sun

In 1935 There Will Be Seven Eclipses

Seven eclipses of the sun and moon, an unusually large number, take place in 1935. Two will be visible in Canada and the United States.

The first of these is a partial eclipse of the sun on February 3. At maximum, seven tenths of the sun's diameter will be covered by the moon's shadow, enough to chill the air and turn the sunlight temporarily greenish-yellow.

This maximum shadow will cover the United States west of the Rockies, and nearly half of western Canada. In the rest of the United States and Canada it will be less, a smoked glass spectacle.

The second eclipse visible in Canada and the United States will come on July 16, a total eclipse of the moon.

"There will be this year the rare happening of the maximum number of eclipses that can occur in one year," says Herbert C. Wilson in popular astronomy.

"There are five of the sun, two of the moon. There might be four of the sun and three of the moon, but there never can be a total of more than seven."

The "Split Second"

Time Elapsing Between Warning To Brain And Action

The "split second" is the period which elapses between when a warning goes home to the brain and when the physical reaction to that warning is made. Upon what particular reaction takes place in some cases have depended many lives and issues of great importance, but that reaction is not determined by logical thought processes. It depends upon conditions of which the person in question is probably unaware—details of the past which (to use a scientific word) have "conditioned" the nervous system so that an impulse will produce an action without the subject being conscious of having made a decision.

The eyelid automatically blinks when an object is thrust close to it; the fingers automatically find the keys of a typewriter; the boxer automatically defends himself against blows—these are the skilled, but when a routine function day after day becomes so practised that he also operates automatically.

Makes Fast Time

Major Doolittle Establishes A New Transcontinental Flying Record

Major James R. Doolittle, noted speed flier, established a new transcontinental record for transport airplanes when he touched his wheels at Floyd Bennett airport, New York, 11 hours 59 minutes after his take-off at Los Angeles.

Doolittle was timed at Floyd Bennett at 8:26 a.m., E.S.T., and 8½ minutes later he set the low-winged transport monoplane down at Newark airport. Although previous transcontinental speed flights had ended at Newark, Doolittle's time at the New York field was considered for record purposes.

His time of 11 hours 59 minutes broke by minutes the mark set last November 8 by Eddie Rickenbacker, when he flew from Los Angeles to Newark in 12 hours 3 minutes 50 seconds.

Customer: "Ginger Ale." Waiter: "Pale?" Customer: "No, just a glass."

President Andrew Johnson was a tailor for seven years before he learned the alphabet.

The Road To Health

Dairy Products Play Large Part In Body Building

Modern science is responsible for the addition of ten years to the average span of life, and foremost in that creditable accomplishment may be placed the knowledge of the nutritional value of foods. In other words to live long one must understand the close relationship of well-balanced meals to bodily health.

In this, dairy products, such as milk, cheese, butter, and ice cream play an important part. Milk is known as the food for which there is no substitute. Its bodybuilding materials are of the highest quality; its fat is easily digested; it is the best source of lime (calcium) and contains a liberal amount of phosphorus—the two minerals so necessary for the development of bone and teeth. Like milk, cheese is an economical, healthful food. Its high food value is supported by the fact that a pound and a quarter of cheese contains fully as much protein (body-building material), calcium and phosphorus as a gallon of whole milk. Butter is also highly nutritive, containing vitamins which place it first among the fats, and, if those nutritive qualities of butter were as much appreciated as its flavor, there would be still greater consumption of butter in Canadian homes. Cream, from which butter is made, and ice cream are likewise very important, not only for their palatability but for their contribution to health.

Honey Differs In Color

Three Classes Graded But Food Value Not Affected

Honey varies in color and flavor so that there is no difficulty in finding a honey to suit every taste. On account of this variation of characteristics, honey is classified and graded according to its color and quality. The color classes most commonly used are "White," "Golden," "Amber," and "Dark." Color, however, does not affect the food value of honey. From the nutritional standpoint, all colors have equal value, but the flavor of the darker colored honey is generally much stronger than that of the lighter kinds. The quality grades of honey are Nos. 1, 2, and 3, indicating texture, density and flavor. The lighter colored and highly graded honeys are especially adapted for table use and as a rule are more expensive than the dark or low graded honeys, a fact which may be taken into consideration by the buyer when purchasing honey for cooking purposes. The lower grades of honey are equally as good as the higher grades when used as a substitute for sugar in cooking, but when delicate dishes are desired the pure to use light honey. To the bee-keeper who produces honey for his own use, value is of secondary importance, so that in addition to substituting honey for jams, jellies, and marmalades, he is in the position of being able to use honey for sugar in cooking with most pleasing results.

Widen Air Mail Facilities

Faster And Cheaper Service May Be Inaugurated For Dominions By 1937

Sir Kingsley Wood, British postmaster-general, in a speech at Bath said he hoped that, with the co-operation of the Dominions, letters could be sent halfway around the world by air mail in 1937 for three cents in a week instead of a month.

He said a correspondent in Britain would be able to obtain a reply from Australia in little more than a fortnight, while India would be little farther away than a few days was concerned, than were Hungary, Spain or Sweden at present.

Such a project would put considerable demands upon postal funds but Sir Kingsley said he hoped increased correspondence would make it remunerative.

Had Excellent Reason

A preacher at the close of one of his sermons said: "Let all who are paying their debts stand up." Instantly every man, woman, and child, with one exception, rose. The preacher seated them and said: "Now every man not paying his debts stand up." The exception noted a careworn, hungry-looking individual clothed in last summer's suit, slowly assumed a perpendicular position.

"How is it, my friend," asked the minister, "that you are the only man not to meet his obligations?" "I run a weekly newspaper," he meekly answered, "and the prettiest who stood up are my subscribers and—"

"Let us pray," exclaimed the minister.—Catholic Times.

Standardized grading appears now to have become definitely established as a permanent factor in practically all phases of the poultry trade in Canada.

Stratosphere explorers say the sky appears to be a deep purple at the great heights to which some of the stratosphere balloons invented by scientists have risen.

A large proportion of the world's sulphur comes from a few Gulf Coast salt domes.

MICK THE MILLER TO APPEAR IN CANADA

Mick Miller, the world's famous greyhound, is to visit Canada and the United States on an extensive tour. The object of the tour is to get promoters interested in greyhound racing, which is very popular in the British Isles.

The Noise The Weevil Makes

Magnified Ten Thousand Billion Times It Created Some Stir

A boll weevil, cause of so much sorrow to farmers of the south, was a star performer for science in New York.

The noise the weevil makes when "chewing" was magnified by a "sound microscope"—10,000 billion times and the noise was so great that it could be heard all over one of the buildings at New York University.

Dr. E. E. Free, who demonstrated the "sound microscope," said he did not dare use the device in connection with any sound normally heard by the human ear.

The purring of a cat, if amplified 10,000 billion times, he declared, could be heard in San Francisco without the aid of telephone or radio.

The Same Firm

At a rural railway station, a signalman, porter, and ticket collector. Even then he sometimes had a little time to spare. A passenger one morning found him sweeping the little platform with herce energy. "Why, my man," said he, "you're going about your job as though this were Paddington station." "Same firm, sir," replied the man, briskly saluting and resuming his sweeping.

Chemists are trying to learn the secrets of the moleculon, just as physicists are trying to learn the structure of the atom.

Thousands of people remain pyromaniacs all their lives because they never dare be themselves. They are afraid to take the initiative. They ruin their judgment by not using it, by depending upon others, running to them for advice, and always following the track marked out by some one else. They are mere echoes, trailers.

"That new office manager speaks very highly of us, Ella. I heard him say we were perfect nonentities!" There is a mushroom farm under the streets of Paris.

The feed of fish meal has been confined largely to swine but it has also been used successfully for dairy cattle, and in a limited way for other livestock. Growing market animals and milking cows seem best adapted to utilize efficiently fish meal and other high protein feeds combined with carbonaceous grains. Fish meal is relatively more valuable for rapid gains and high production than for maintenance. However, fish meal may be included to advantage in maintenance ration of breeding animals, but the percentage should be lower than that normally included in the growing ration.

The American Tree Association declared that 23 of 30 plantings areas had been selected tentatively each for the planting of 130,000 trees in strips five miles long and 10 rods wide. They will be established in the Dakotas, Nebraska, Kansas, Oklahoma and Texas.

Designed to provide windbreaks for cultivated land, the project was endorsed by President Roosevelt and set in motion with an allotment of \$1,000,000 in 1934. When completed it will provide a belt of trees planted in the 10-rod wide strips over a 200 miles wide area.

Lark is Destructive Farmers in England Not Very Keen About Songster Even if Shelly wrote an ode about it and Schubert was inspired by it to compose a beautiful melody, the lark is just a bird that damages wheat and farmers in the vicinity of Norfolk, England, and they have started a war on the songster. The Norfolk Agricultural Committee has excluded the bird from the new order under the Wild Birds Protection Act. Anyone who shoots a lark and has a lark pie. "The skylark is a nice bird, but we don't live by listening to its music," said George Hewitt, an agricultural leader. The larks are said to invade England in flocks from Germany and Russia.

Newport Arch in Lincoln and Balmerne Gate in Colchester are England's only two remaining Roman gates.

Renowned Varieties Of Grain Now Grown In Canada An Epic In Scientific Achievement

When Honey Granulates

Sign Of Purty As Sugars Cause

So many household foods keep best in the refrigerator or ice-box that the housekeeper may be pardoned for the common mistake of keeping honey there also.

The cold of the refrigerator may cause the honey to become cloudy and crystalline, but because honey contains sugar chiefly it does not spoil readily. As a matter of fact, honey keeps best in a warm dry place, like the pantry shelf, for instance. If tightly closed, it can be kept almost indefinitely at ordinary room temperature. At the same time it should never be stored in a cellar or other likely damp place because the container is firmly sealed because it will absorb moisture and ferment, just as any other sugar syrup will. All Canadian honey granulates sooner or later, depending largely upon the proportion of the two invert sugars—grape sugar (fruit sugar) and dextrose (sugar)—it contains. The greater the proportion of fruit sugar to grape sugar, the longer will the honey remain in liquid form. Containing two groups of children, one of which had had severe rickets in earlier years, and another which had been practically free of the disease, found many more defective teeth among the children who had been rickets victims.

Defective Teeth

Scientists Find Trouble Comes As Aftermath Of Severe Rickets

A new clue to causes of faulty tooth development, showing defective teeth often are an aftermath of severe rickets, the bone disease of childhood, was reported by the children's bureau at Washington.

Scientists of the bureau, in examining two groups of children, one of which had had severe rickets in earlier years, and another which had been practically free of the disease, found many more defective teeth among the children who had been rickets victims.

The study proved some defects in development of teeth can be greatly lessened and usually prevented by giving children frequent sun baths and plenty of cod liver oil when they are at the ricket age, the scientists said.

Fish Meal For Stock

Valuable On Account Of Mineral And Protein Content

In the field of livestock feeding fish meal has proven a rich source of nutrients. It is fed particularly for its protein and mineral content, and the percentage of these ingredients determines its value. There are three factors which have retarded the widespread use of fish meal, says the Fish Meal and Oil Bulletin, just issued by the Dominion department of agriculture. First, there is its rather high price in comparison with the price of other feeds; second, the lack of definite information regarding its use; and third, a variability in the product.

The feed of fish meal has been confined largely to swine but it has also been used successfully for dairy cattle, and in a limited way for other livestock. Growing market animals and milking cows seem best adapted to utilize efficiently fish meal and other high protein feeds combined with carbonaceous grains. Fish meal is relatively more valuable for rapid gains and high production than for maintenance. However, fish meal may be included to advantage in maintenance ration of breeding animals, but the percentage should be lower than that normally included in the growing ration.

Animals Play Like Children

Most Young Ones Are Fond Of "Tug-of-War"

Animals play games of their own invention, as children do. Most young animals are exceedingly fond of "tug-of-war." Young foxes are particularly addicted to this form of sport, pulling against one another with might and main, and every dog lover has seen terriers doing the same thing. Others are fond of "biting the chute" down a slope already well worn by generations of "shooters." Naturalists say that badgers play "King of the Castle" by moonlight. One of them mounts to the summit of a hillock and holds it against all comers, the badger who is "king" of taking his place until he, too, is dispossessed. They play in perfect good temper for hours at a stretch. Lambs are often observed to play a similar game. Both cats and dogs play hide and seek. A dog and a cat in the same house will thus play together, but the cat always hides and the dog finds.

Time Well Spent Occasional Breathing Spaces Make Day's Work More Efficient Immediately after breakfast, just sit still for a matter of ten minutes or so before plunging into the day's activities. This makes all the difference between being worn out and fresh at five o'clock in the afternoon. During the morning, don't say: "I haven't a moment to spare." Sit down and have a cup of tea or coffee at eleven o'clock. You will go on with your work with renewed vigor.

When travelling, if you can spare time, go into the refreshment room and have five minutes' rest and something to eat. This will keep you from tiring too soon. Shopping, don't tear from one shop to another without pausing, so that, at the end of the day, you are done up and ready only for bed. When reading a book, pause every now and then and think over what you have been reading. This will help you to make the book more enjoyable.

Very Modest About It George Bernard Shaw Claims He Could Have Prevented War

George Bernard Shaw, after years of meditation, has discovered the man who almost prevented the World War. He is George Bernard Shaw. In a letter to London's Liberal weekly, "The New Statesman and Nation," Shaw announced that his own advice to the then British foreign secretary, if followed, could have averted the conflict of 1914-18. "Think of the fact," the Irish writer wrote, "that the Great War, with its millions of deaths and mutilations, might have been avoided if Sir Edward Grey had done what I told him to do in 1913."

Flier Sails For Home Sir Charles Kingsford-Smith, trans-Pacific flier, sailed for his home in Australia from San Francisco, aboard the liner Monterey. Sir Charles recently crossed the Pacific for his second time by air when he flew from Australia to Oakland in a three-leg hop.

A. M. CAMPBELL, Ltd. | Lacombe

ANOTHER OLD TIMER DEAD

The death of Mr. S. Munroe Gwin one of the very earliest settlers in Rimbey, occurred at his farm home three miles east of town on Saturday morning, February 9th at the age 87. Although Mr. Gwin had been in poor health for some weeks his death came as a distinct shock to his many friends and associates, particularly those who had followed him as a leader in the long trek which led to the original colony of settlers in the Rimbey district from their old homes in Kansas to the new Canadian West. A full account will appear next week.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, Minister
Mr. L. D. Wright,
Musical Director
Services at 11 a.m. and 7:30 p.m.
Sunday School at 11 a.m.
The W.M.S. will meet at the home of Mrs. Cliff Danner on Tuesday afternoon at 3 p.m.

The Y.W.A. will hold their monthly meeting at the Church Hall on Tuesday evening. It will take the form of a Supper at 6:30, with business transacted afterwards. It is expected that a Men's Brotherhood will be organized on Sunday, Feb. 24th, when a Team of men from Edmonton will be present under the leadership of Mr. Nelles V. Buchanan, who is President of the Laymen's Association of Alberta, connected with the United Church. Mr. Buchanan will also give an account of his attendance at the General Council. This meeting will be held in the Church in the afternoon. At Blackfalds United Church a service will be held at three p.m. conducted by Rev. R. B. Layton.

ENTRIES POURING IN FOR HORSE SALE

Secretary Fraser this week received word that T. A. Ballman, of Kamloops, B.C. is shipping two carloads of well bred Clydesdale Horses all young and weighing from 1200 to 1500 lbs., to the Lacombe Horse Sale to be held on March 19. The officials of the horse sale have been working for several years to interest outside breeders in this sale and this entry is a result of their endeavors. This is a splendid opportunity for our farmers to secure good horses to take the place of those that are getting up in years.

Fully experienced married couple without children, with household equipment, desire to rent an equipped farm, or would work for farmer with separate house. Evan Roberts, one mile north of Blackfalds.

FOR SALE—Grade Holstein cows and heifers. Fresh or coming fresh. Phone 2203. SE 12-42-28. W. L. Ingram.
